

Give Me a Brake!

One of the most important components of your Acura's braking system is the brake fluid. As you apply pressure to the brake pedal, the fluid transfers pressure to the brake caliper assemblies at each wheel. That's a simplified description of a complex process, which includes actions by the master cylinder, the ABS (anti-lock brake system) control unit, the calipers, and numerous sensors.

To ensure that these components continue to perform their intended function requires a fluid that does not compress and that can withstand very high temperatures without boiling.

Because brake fluid is hydroscopic, over time it can absorb moisture, lowering the fluid's boiling point and increasing the likelihood of corrosion in many critical components. That can compromise your safety and be expensive to repair.

Changing your brake fluid every three years and specifying Honda Heavy Duty DOT 3 brake fluid will help ensure that you get the maximum safety and service life from your braking system.

Our brake system service prices:

Brake fluid flush and refill	\$138.96
Parking brake adjustment	\$12.99
Front and rear brake inspection	\$39.99

Oil—the Life of Your Acura

You are probably aware that oil is a lubricant, but did you know your vehicle's oil has many other functions as well?

Your oil also plays a critical role in keeping your engine cool. The combustion process generates heat that can reach several thousand degrees. Without oil, your vehicle's coolant system would be quickly overwhelmed.

Oil also helps keep your engine clean. By-products of combustion and other contaminants (such as dirt from driving in dusty conditions) are carried to the oil filter where they are captured and held between oil changes.

Following the recommended oil change intervals can help ensure that the oil in your Acura's engine is up to these important tasks.

Continental Acura uses Castrol Full Synthetic motor oil without any additional cost to you.

Get On the Right Track!

Has your Acura got a mind of it's own? Does it want to go one way while you go the other? You may need our precision four-wheel alignment!

Correct wheel alignment can significantly increase the life of your tires, and that's important to minimizing your overall maintenance costs. Additionally, correct wheel alignment can help ensure that your vehicle handles as it was designed. Our Acura factory-trained service technicians will check and adjust all alignment settings, check tire pressure and wear patterns, center the steering wheel, and get you back on track!

Our alignment service price:

Four-wheel alignment	\$169.99

Regular Preventive Maintenance

Regular preventive maintenance for your Acura is one of the best ways to protect your investment. Proper maintenance is also essential to your safety and that of your passengers.

When your vehicle is serviced at our dealership, factory trained technicians use the latest technical information and special tools to perform all recommended procedures. Our level of service is designed to be on a par with the quality of the vehicle you own.

Our Acura technicians know Acuras inside and out, so they can even spot small problems and correct them before they require costly repairs. We also use genuine Acura parts and accessories to maintain the performance level you expect from your Acura.

Genuine Honda Fluids

To help ensure a long service life for your Acura, we use genuine Honda fluids when servicing your vehicle. Take our PRO HONDA® HP Coolant for example. It's a uniquely formulated ethylene glycol based product engineered by Honda R&D to help give maximum service life to all Acura cooling systems. For convenience, it has been blended to the factory specified 50/50 mix with purified, de-ionized water.

Over 95% of the coolants on the market use silicate inhibitors to prevent corrosion, but these silicates can cause premature wear to water pump seals, so Honda engineers demanded a superior corrosion inhibitor without silicates.

You can be sure all of our genuine Honda fluids meet the demanding specifications set by our engineers.

Precision Crafted Service™

Quality, Convenience, and Competitive Prices

Thanks for coming in! Here at Continental Acura of Naperville we strive to provide you with the finest possible service for your Acura. Our factory-trained technicians have more than 185 years of combined experience and they regularly attend additional training to be sure they are always up to date on the latest servicing techniques. We also maintain a complete set of special tools and test equipment designed specifically for use with Acura automobiles. And all work performed in our dealership is backed by a 12-month/12,000 mile warranty.

For your convenience, we offer a number of special services:

- Express Service Team - No appointment needed
- Online confirmed service appointments to ensure you are in and out quickly
- Complimentary iPads while you wait for your vehicle
- Shuttles to and from work or home (within a ten mile radius)
- Loaner vehicles (some restrictions apply)
- Morning coffee service, featuring Starbucks® coffee
- Complimentary fresh baked Otis Spunkmeyer cookies
- A comfortable waiting room with refreshments
- Clean restrooms
- A children's play area for our youthful future Acura owners
- Private work spaces with computer hook-ups in our waiting area featuring wi-fi
- Complimentary vehicle wash and vacuum with every service

And, of course, we always use genuine Acura replacement parts to help give you the peace of mind that your Acura will continue to perform well for many more miles!
